DETAILED ACTION

Acknowledgment

1. The amendment filed on 8/29/2007 has been entered.

Allowable Subject Matter

2. Claims 3 and 5-13 are allowed.
3. The following is an examiner's statement of reasons for allowance.

The prior art does not teach the hybrid vehicle as recited in claims 3 and 8, which include a battery module comprising a plurality of nickel-metal hydride storage cells, each of the storage cells comprising positive and negative electrodes, which are included nickel and hydrogen-absorbing alloy, respectively, as electrochemically active materials. The hybrid vehicle also includes a separator disposed between the positive and negative electrodes. The hybrid vehicle also includes an electrolyte immersing therein the positive and negative electrode. The negative electrode has a theoretical capacity larger than a theoretical capacity of the positive electrode so as to provide a charge reserve capacity when the positive electrode is in a fully charged state and to provide a discharge reserve capacity when the positive electrode is in a fully discharged state. The discharge reserve capacity is being smaller than charge reserve capacity. The hybrid vehicle also includes a generator driven by an engine to recharge the storage cells. The hybrid vehicle also includes means for detecting states of charge of the respective storage cells and means for controlling the engine and the generator to

keep an average of the states of charge of the storage cells at a given value or higher.

This recitation, in combination with the rest of the recited elements, clearly defines over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
